Unit 3 Activity 39 Monopoly Pricing Answers

Here is a quick economics question and answer regarding monopolies: A monopolist has two types of customers. There are 100 Type A, who will each pay up to \$10 for a single unit of the good, and 50 of Type B, who will each pay up to \$8. Neither is willing to purchase additional units at any price. If it must charge a uniform price, find that price.
