Harness 1 is routed beneath the line, but it is protected by a shroud. Harness 2 is routed above and perpendicular to the fuel line, but the supporting clamps are too far apart to prevent sagging and chaffing on the tube. Harness 3 is routed horizontally, parallel to the line, which is not an issue.

Rules for Routing Aircraft Wiring | 2016-04-29 | Assembly ...

Airbus is a European, multinational aerospace corporation and the world's largest airliner manufacturer. Airbus Industries is made up of three divisions: Commercial Aircraft, Defense and Space, and Helicopters.At Tronair, we're proud to carry a wide array of Airbus commercial aircraft model-specific products and ground support equipment.
