Diffusion and Heat Exchange in Chemical Kinetics

Researchers at North Carolina State University are said to have discovered a new law of physics that could enable improved friction and grip in robotics.

New law of physics could improve grip in robotics

The adult ocellated lizard skin colour pattern is effectively generated by a stochastic cellular automaton (CA) of skin scales. Here authors use reaction diffusion (RD) numerical simulations in 3D on ...

Reaction-diffusion in a growing 3D domain of skin scales generates a discrete cellular automaton

Although robotic devices are used in everything from assembly lines to medicine, engineers have a hard time accounting for the friction that occurs when those robots grip objects—particularly
