Forensic Psychotherapy: Crime, Psychodynamics and the ...

Psychodynamic explanations of offending behaviour focus on the influence of early childhood experiences and how they impact later development. For example, Freud's concepts of the unconscious mind and tripartite (three part) personality can be used to explain the development of criminal behaviour. The superego is the part of personality that is likely to be related to offending behaviour, as ...

The theoretical foundations of psychotherapy with offenders (or forensic psychotherapy, as it is known) are psychoanalytic in origin. Whilst neither Freud nor Klein, for example, devoted much of their writing to the subject of crime, many of their ideas continue to underpin theory and practice of therapeutic work with offenders (Cordess and Cox 1996).

It is argued that such offense analysis should already be a routine component of forensic clinical assessment; however, anecdotal evidence would indicate that this is not so. Improving this aspect of the assessment process, when used in conjunction with other actuarial and structured clinical approaches, should improve any attempts at treatment planning and risk assessment.
