If you have a shifting problem with your Honda manual, check the clutch hydraulics for leaks, particularly the clutch master.

These have been known to leak, and when they do they can cause shifting problems, usually grinding into gears. In addition to checking the hydraulics, check

Transmission. Manual  
transmission leaks can

be caused by: bad or  
worn-out seals or

gaskets, a damaged  
case or component, or  
even loose bolts. To

verify that a leak  
exists, first, check the  
transmission case and  
oil level. If it leaks after  
you just replaced the  
oil, you may have put  
too much. Consult your  
vehicle repair manual.

In Honda's desire for more performance and better fuel economy, Honda has been developing innovative transmissions on a regular basis.

Therefore it is important to use the exact type of transmission fluid stipulated by your Civic's owner's manual. Many vehicles with manual transmissions do not have a dipstick and their fluid level
