High-Risk Pregnancy Environmental Triggers Keep in mind that unhealthy lifestyle habits can affect pregnancy as well. Smoking, excess alcohol consumption and illicit drug use will increase your risk of pregnancy problems. In fact, drinking during pregnancy exposes your unborn child to many health risks, some fatal.

What is a High-Risk Pregnancy? | American Pregnancy ...

Sometimes a high-risk pregnancy is the result of a medical condition present before pregnancy. In other cases, a medical condition that develops during pregnancy for either you or your baby causes a pregnancy to become high risk. Specific factors that might contribute to a high-risk pregnancy include:

High-risk pregnancy: Know what to expect - Mayo Clinic

One of the most common risk factors for a high-risk pregnancy is the age of the mother-to-be. Women who will be under age 17 or over age 35 when their baby is due are at greater risk of...

Managing a High-Risk Pregnancy - WebMD

It's called "morning" sickness, but pregnancy queasiness can hit at any time. To ease nausea at work: Avoid nausea triggers. That double latte you craved every morning before pregnancy or the smell of foods reheated in the break room microwave might now make your stomach flip-flop.

Working during pregnancy: Do's and don'ts - Mayo Clinic

Either way, having a high-risk pregnancy means it's more likely that you or your baby will have health problems during pregnancy, birth, or after delivery. These could be very minor problems, but in some cases, a high-risk condition can be life threatening for a woman or her baby.

What is a high-risk pregnancy? | BabyCenter

In a high-risk (at-risk) pregnancy, the mother, fetus, or neonate is at increased risk of morbidity or mortality before or after delivery. In 2015, overall maternal mortality rate in the US was 14/100,000 deliveries, as estimated by the WHO; incidence is 3 to 4 times higher in nonwhite women.
