Computer networks for the home and small business use either wired or wireless technology. Wired Ethernet was once the common choice for homes and businesses. However, Wi-Fi and other wireless options are now prevalent in homes, while many businesses still rely on wired networks. Both methods have advantages over each other, and both represent viable options for home and other local area ...

Self-service is in and human interaction is out -- or at least that's the case when it comes to booking travel and the airport experience, says the latest SITA research. The look at trends in passenger IT reveals that almost every flight is now booked using self-service technology. Only 8% of respondents to the research had contact with a human.

Self inductance unit: The self-inductance of a coil is said to be one henry if a current change of one ampere per second through a circuit produces an electro-motive force of one volt in the circuit. Self-inductance basics. When current passes along a wire, and especially when it passes through a coil or inductor, a magnetic field is induced.

The move continues the consolidation in self-driving technology, as the process of creating safe, secure autonomous vehicles continues to cost more and take longer than prognosticators once believed. Uber ATG lost \$303 million between January and September of this year, according to financial filings, and the company has spent more than \$1 billion in its five years of existence.
