5 Bell PVC Train Locomotive Leslie Build Your Own Air Horn

Leslie and Nathan may sound like a dull couple from the 'burbs, but they're actually the first chairs in railroading's horn section. The diesel locomotive horn section, that is. Many of today's train-watchers recognize a railroad by the sound of its diesels' horns. It's only natural since sound is a strong memory-jogging sense, second only to ...

I have tested the decible output of my PVC M5 horns and found that they produce about 124db with my preferred diaphragms installed. I own a few sets of real train horns and I find that my PVC train horns have a very pleasing comparable sound. They sound best from 60-110 psi but will blow with as little as 30psi.

S-5t Ed K.mp3: My Leslie S-5t sounding the standard B9th. major chord, from our get together on the Montrose TP. Bradford, Pa. uGG1a200.mp3: A PRR. GG-1 blowing by with its Leslie A-200 sounding . Nathan H Series. H5_Jodie_Wells_9-25-04.mp3: This is among the least common of all locomotive air horns. Only 5 Nathan H-5 horns are known to exist.

Train Horn Sounds - Edward J. Kaspriske

While Leslie horns were common on new locomotives years ago, the majority of new freight and passenger locomotives today are equipped with Nathan horns. For a period of time, many railroads went to great lengths to find just the right horn to produce a sound that was pleasing and effective.

All about air horns | Trains Magazine

The most common horns that appear tend to be those that are still in active service, such as Nathan Ks and Ps, and Leslie SuperTyfons, though older and rarer horns do show up on occasion. The prices may not always be the best, but in general, it seems that eBay has reset the value of a train horn, and so, depending on the auction, you may not do much better outside of eBay.

Locomotive Horns - Where to Get 'em

THE UNDISPUTED KING OF TRAIN HORNS. The most common question we get asked is, "What are your loudest horns?" Well, here they are! The same horn used on most American locomotives for decades, the Nathan AirChime K5LA train horn.While there are many kinds of train horns, the Nathan AirChime K5LA is the golden standard that other train horns attempt to duplicate.

Nathan Locomotive Horns | #42754811 - Worthpoint

Nathan Manufacturing, Inc. is a division of Micro Precision Group which makes Airchime, Ltd. train horns for North America. It is one of two major train horn manufacturers in the United States, Leslie Controls, Inc. being the other. Nathan horn manifolds are "stout and solid-looking", while Leslie's are "open and lacy".

Nathan Manufacturing - Wikipedia

The Nathan-Airchime K5LA is a five-chime North American airhorn or train horn commonly used on diesel locomotives, but can often be found on electric locomotives and cab units from EMUs (electric multiple units); such as the AEM-7, and the Acela Express HST trainsets used by Amtrak throughout the Northeast Corridor. The K5LA has been in production since 1976, though the prototypes were ...

Nathan K5LA Airhorn | Trains And Locomotives Wiki | Fandom

The Leslie company is now known as Leslie Controls, Inc. Below is a general timeline covering the major milestones in Leslie's horn lines. Timeline.
1934 - Leslie starts marketing its Tyfon series of air horns for railroad use
1950 - Chime-tone horns are introduced, giving Leslie the ability to market chime air horns.

Locomotive Horns - Leslie

locomotive begins to move only after the prime mover has reached notch one. Although this behavior is very prototypical, it may not be preferred. ...
