Geography is the study of the physical and human/social environments of the Earth, while urban inquiry focuses on the people and processes of cities and towns -- which now account, for the first time in human history, for a majority of the world's population. Urban geography, then, is concerned with the relations among people, and between people and their environments, in cities and towns across the world.

Lectures come in many different forms, some more effective than others. The least effective form of lecture involves a teacher reading from notes or the text without differentiating for student needs. This makes learning a passive activity and students may quickly lose interest. The lecture is the

most used strategy.

### **Strategies for Presenting Content in the Classroom**

Latitude refers to the imaginary horizontal lines that run from east to west around the globe. 0 degrees is the Equator. Longitude refers to the imaginary vertical lines that run from north to south around the globe. 0 degrees is the Prime Meridian 22.
